Work Experience

from January 2025 - Present

Frontend Lead

Inditex (from Kelea)

Frontend Architecture Enterprise Platforms Technical Leadership
Shared Frontend Systems AI Contextual Architecture
Performance & Scalability Multi-team Delivery Quality Standards
UI/UX Governance

from October 2023 to December 2024

Frontend Lead

FXStreet

Mobile Product Frontend Architecture Technical Leadership
Mobile-first Architecture AI Adoption App Built from Scratch
Performance & Scalability UI/UX Governance

from November 2020 to October 2023

Frontend Lead and UX/UI Systems Designer

Tiendeo

Design Systems Frontend Architecture Technical Leadership
Creative Automation AI Adoption React-based Tooling
Scalable Creative Workflows Product Maintenance

from July 2019 to October 2020

Frontend Developer and UX/UI Designer

Axpe Consulting

Frontend Development UX/UI Design Client Projects
Automation Tools Healthcare Platform

from March 2016 to May 2019

Frontend Developer and UX/UI Designer

Inbenta

Frontend Development UX/UI Design Client-facing Platforms
Scalable Styling Systems Sass Automation

from December 2012 to October 2014

UI Designer

Ingens Networks

UI Design Motion 3D Rendering Web Interfaces Print

Cover Letter

Hello,

I'm a Frontend Architect and Tech Lead focused on building frontend platforms designed to last. My background sits between engineering and UX/UI design, and I'm most comfortable working on systems where architecture, design systems, and developer experience truly matter.

Over the last few years, I've worked across very different contexts: global enterprise platforms at Inditex, a mobile product built from scratch at FXStreet, and design-driven automation at Tiendeo. I've led frontend work across multiple teams (up to 4 teams, around 30 people), making architectural decisions, defining shared standards, and staying technically involved whenever needed.

While frontend is my main specialization, I'm familiar with working with both relational and non-relational databases. This gives me better technical context and allows me to collaborate more effectively with backend, product, and other areas of the organization, helping me make frontend decisions that are better aligned with the system as a whole.

I tend to focus more on impact than on output. That has meant, for example, reducing creative production time by around 80% through automation, designing shared frontend systems used across multiple products, or shaping architectures that scale across teams without slowing development. I've also been involved in introducing AI tooling in a pragmatic way, integrated into real workflows rather than treated as side experiments.

I'm interested in roles where I can combine technical ownership with design thinking, help teams make better decisions, and build systems that are clear, scalable, and maintainable over time. I'm looking for an environment where that mix of architecture, product mindset, and hands-on work is valued.

I'd be glad to talk and see if there's a good fit.

Best regards.

Fernando Bendala Burgos
